DO ALL THESE BOTHER YOU IN YOUR DAY TO DAY PRACTICE?

Shade Selection?

Isolation?

Contacts and contours?

Textures?

Anatomical build up?

Finishing and Polishing?

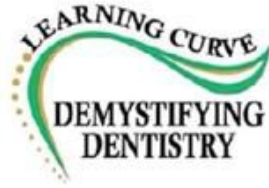

Keep it simple & inexpensive

Modified toffelmire customised to your needs

It's not about having the best of resources it's about making the best of available resources

Day 1

- Introduction to composites
- Dentin bonding systems
- Armamentarium for direct composites
- Importance of rubber dam isolation
- Evolution of matrix system, when and why?
- Predictable contact and contour build up
- Wedges and teflon, what to use and when
- Steps to Biomimetic build up class 1 & 11
- Occlusal stains, how do use
- Finishing and polishing
- Clinical solutions to common problems
- Minimising post operation sensitivity
- Tips on documentation and its importance

Day 2

- Properties to look for in Anterior Composites
- Predictable Shade Selection techniques
- Concept of hue, chroma, value, opalescence, translucence, incisal halo
- Customised shade guide fabrication
- Hiding the grey margins
- Concepts of "histologic layering"
- Layering technique for class 4 (controlled body thickness)
- Concepts of re bonding to previous composite for correction
- Steps to predictable finishing and polishing
- DSLR camera importance in documentation
